Use Determination & Recommendation:

Has the use existed since November 28, 1975? ☐ Yes ☐ No ☒ Unknown  
Comments:

Is the evaluated use attainable? ☐ Yes ☒ No

Comments: The UAA was conducted in May, 2005 and no WBCR was observed. The maximum depth criterion was not given at site 1, but was not met at any of the other 3 sites. The average depth criterion was met only at site 1 of the 4 sites evaluated. Except for around the bridge at site 1, the stream was extremely shallow. No interviews were conducted. Because of the overall shallow depth of the stream, the committee recommends removing the WBCR designation.

**Committee Recommendation:** ☐ Retain Use ☐ Modify Use ☒ Remove Use ☐ Inconclusive
